Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 August 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art.

Applicant admits that placing a paper liner within a "standard plastic grocery sack" is old and well known. However, a paper liner whose base and height are "approximately equal" to that of an expanded "standard plastic grocery bag" is not found. It would have been an obvious matter of design choice to make the admitted prior art paper liner with base and height dimensions that are approximately equal to a standard plastic grocery bag (this includes those dimensions recited in claims 3-7 and 10), since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

There is nothing applicant's disclosure that would indicate the increased paper liner capacity and reduction in paper liner material, by making the admitted prior art paper liner with base and height dimensions that are approximately equal to a standard plastic grocery bag, is an unexpected and superior result or the result of routine experimentation.

Art Unit: 3727

Furthermore, the disclosure of the paper industry and its trade associations "objectives" (on pages 6-7 of the specification) is considered to be applicant's opinion; as is applicant's statement of "long-felt but, as yet, an unmet need which others have failed to address."

Regarding claims 2 and 7-11, the admitted prior art discloses the claimed invention, as discussed above, except for the grade of the paper liner being between 35 lbs. and 50 lbs.. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a grade of paper between 35 lbs. and 50 lbs. for the admitted prior art paper liner, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

3. Applicant's arguments filed 8/8/02 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the liner being made of a lighter weight paper than normal paper grocery sacks) are not recited in rejected claims 1 and 3-7. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Art Unit: 3727

Applicant's argument that both the paper and plastic industries promote their respective products to the exclusion of the other's product, thus teaching away from the use of a paper liner specifically to be used inside a plastic grocery sack is not supported by any factual evidence. Furthermore, the argument fails to address applicant's admissions that, "It is a popular perception of the consumer that insertion of a paper sack into a plastic sack adds carrying strength to the plastic sack." (see applicant's specification, page 4, lines 15-17) and "Due to consumer preferences, there is a continuing trend in the supermarket industry across the country for consumers to request the use of a paper sack in a plastic sack the use of a paper sack in a plastic sack." (see applicant's specification, page 4, lines 21-23).

Applicant's statements in the affidavit of commercial success are conclusory. It is not clear that the commercial success alleged is directly derived from the invention claimed, in a marketplace where the consumer is free to choose on the basis of objective principles, and that such success is not the result of heavy promotion or advertising, shift in advertising, consumption by purchasers normally tied to applicant or assignee, or other business events extraneous to the merits of the claimed invention, etc. Merely showing that there was commercial success of an article which embodied the invention is not sufficient. *Ex parte Remark*, 15 USPQ2d 1498, 1502-02 (Bd. Pat. App. & Inter. 1990). See also *Pentec, Inc. v. Graphic Controls Corp.*, 776 F.2d 309, 227 USPQ 766 (Fed. Cir. 1985) (commercial success may have been attributable to extensive advertising and position as a market leader before the introduction of the patented product). Furthermore, the bulk sales shown in Exhibits A and B are

Art Unit: 3727

incomplete. Gross sales figures do not show commercial success absent evidence as to market share, *Cable Electric Products, Inc. v. Genmark, Inc.*, 770 F.2d 1015, 226 USPQ 881 (Fed. Cir. 1985), or as to the time period during which the product was sold, or as to what sales would normally be expected in the market, *Ex parte Standish*, 10 USPQ2d 1454 (Bd. Pat. App. & Inter. 1988).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
